Elena Khlebnikova

FRONTEND DEVELOPER

Profile

I am a front-end developer with a passion for clean code and exploring new technologies. I spent the last year and a half building my own web applications.

I am a strong team-player with good communication and problem-solving skills which I gained during my previous experience as a teacher.

Technical experience

Portfolio

https://elenadev.me

Next.js 13 portfolio with parallax and cats (the animal, not the library).

MovieMash

https://startling-travesseiro-2774de.netlify.app

React web application for viewing different movies, TV-shows and everything related to them. One of its core features is the sophisticated filtering of movies and TV-shows.

Create Kitchen Form

https://kitchen-form.vercel.app

Next.js 13 (with React Hook Form) web application which I built as part of my collaboration on a new kitchen renting platform. My main achievement was building the form which allows users to add their kitchen listing to the platform by including a wide variety of information such as: description, location, photos, host's languages, rules and availability.

UmVet

 https://frolicking-begonia-777545.netlify.app

React application for a vet clinic, on which users can view doctors, make an appointment with them and leave feedback. I have also created the back-end for this project.

MeowFood

https://dashing-cupcake-30c83a.netlify.app

React application which allows users to view a paginated list of meals, sort and filter them. Users can also add and remove meals from the cart and the total price will be automatically recalculated.

Education

Bachelor degree in teaching of foreign languages (German and English), Kaluga state university, Kaluga (Russia)

SEPTEMBER 2016 — MAY 2021

Received scholarship for scientific achievements (I published a number of articles in my field and was a speaker on a number of conferences).
